MYCON General Contractors, Inc. Promotes Chip Myers to Vice President

Dallas, Texas, July 20, 2023 – Dallas-based MYCON General Contractors, Inc. (MYCON) has promoted Chip Myers, Partner and Project Director, to Vice President. Myers, who grew up in the business, officially joined MYCON in 2016 as a project engineer and since then had forged a path through the ranks, gaining hands-on experience and knowledge that he uses to successfully develop and mentor MYCON’s exceptional employees. He is involved heavily in the strategic leadership of the company, as well as MYCON’s southeast expansion based in Nashville.

“Chip is a strategic thinker with outstanding technical and leadership abilities and a proven track record of building solid relationships, generating solutions, and delivering exceptional results to our clients and his fellow MYCONIANS. I have been looking forward to this day for many years - knowing that Chip will be a part of MYCON’s ongoing success.” – Charles R. Myers, President and CEO of MYCON.

In his new role, Chip will undertake a greater responsibility for acquiring new clients, additional jobs, extending the geographical footprint to better serve clients on the east coast, specifically the southeast, and expanding business units revolving around automation and robotics. One of Myers’ main goals for his new role is creating synergy between business in the new Nashville region, and MYCON’s self-storage and retail sector – led by Jason Meuth, who was promoted to VP alongside Myers. He has put the majority of his time and effort into the expansion to Nashville and is prepared to work with Meuth to win more jobs by having more local knowledge and presence. Led by Myers, MYCON currently has two active projects in Tennessee, with another one to begin later this year, and is currently pursuing more projects in Virginia and elsewhere in the southeast.

Myers received his Bachelor of Science degree from Texas A&M University in Construction Science and a minor in Business. During his time at Texas A&M, he was involved in the TAMU Associated General Contractors (AGC) and helped with the organization of industry sponsored student competitions, and service to the community. He is currently a member of the ULI Local Product Council for Hospitality in the Dallas division.
