MYCON General Contractors, Inc. Begins Construction on New U-Haul Self-Storage Facility in Amarillo, Texas

Dallas, Texas, July 25, 2022 – Dallas-based MYCON General Contractors, Inc. (MYCON) has begun construction on a new three-story, 94,267-square-foot moving truck, trailer, and self-storage rental facility in Amarillo, Texas, for North America’s largest do-it-yourself moving and self-storage operator, U-Haul.

“We have truly enjoyed working with U-Haul on a previous project in McKinney, Texas, and we are thrilled to be working with them on another facility,” said Jason Meuth, CRRP, MYCON Project Director. “MYCON has completed over 1.4 million square feet of self-storage space in the past seven years and has several similar projects in the works. With the slew of people moving to this region, we foresee an increasing need for moving and storage facilities similar to this one.”

The four-acre project site is located at 5316 Canyon Drive in Amarillo, Texas, and is currently occupied by several U-Haul buildings, which will remain fully operational during construction.

The project consists of a tilt-wall, metal stud, and steel-framed facility with 83,000 square feet of conditioned storage and attached 11,267 square feet of U-Box storage. The new building will feature 781 storage lockers in various sizes, ranging from 5x5 feet to 10x15 feet. In addition to the construction of the new building, the existing paving, landscaping, and accesses onsite will also be renovated.

“U-Haul is enjoying success in Amarillo and other markets across Texas thanks to substantial residential growth and increased demand for our self-storage products,” said Matt Merrill, U-Haul Area District Vice President who is overseeing the project. “Customer demand for our U-Box portable moving and storage containers is particularly high, so the addition of a U-Box warehouse will go a long way toward satisfying that need. We are pleased to have the MYCON team working on yet another project. They have proven capable and efficient in helping U-Haul achieve its expansion goals.”

Construction is estimated to be completed in December of 2022.
